

Demeter Biodynamic Trade Association (DBTA)

# Biodynamic Farmer Field Days

Join us to find out more about Demeter USA Biodynamic® standards and practices and how they relate to NOP organic

These field days will be ideal for  
**Demeter certified Biodynamic farms** wishing to increase sales;  
**non-certified CSAs** hoping to expand membership;  
and **NOP organic certified diverse vegetable farms** looking for a new market.

Participants will also be provided with written Demeter Standards, along with other Biodynamic resources, in CD form to take home.

## Learn more about:

- **Biodiversity**, integrating hedgerows, insectaries, animals, etc. to create a whole farm organism;
- **Soil fertility management**, including restricted materials, composting definitions (source materials, preparations, etc.), maximum allowed fertility rates, livestock requirements, and prohibited fertility and feed materials;
- **Biodynamic preparations** introduction and application methods;
- **Crop protection** and preventative management practices, with an overview of restricted material;
- And more...come with questions!
