

SPIKENARD FARM

HONEYBEE SANCTUARY

Now published by Spikenard Farm Honeybee Sanctuary, this year's Stella Natura features refreshed articles on the astronomy, history, background, and indications for planting and cultivation times, along with the hand-drawn charts and thought-provoking articles for which it has become a known and trusted companion.

Another innovation has been the placement of the Key to the Monthly Charts and Visibility of the Planets pages at the back of the calendar, so they can be used as references without removing the calendar from the wall.

We are honored to have been chosen by Stella Natura's creator and long-time editor, Sherry Wildfeuer, to steward this amazing legacy into the future, and we are grateful for her continued friendship, contributions, and collegueship. We look forward to enlivening connections with our biodynamic community and welcome your input, questions, and research.
